

Mandatory Meat Nutritional Labeling Rule. Are you ready? We are!

After meeting with the USDA/ FSIS, Yerecic Label has designed ground beef labels that will make you compliant with the Mandatory Meat Nutritional Labeling Rule which goes into effect January 1, 2012.

There are many variations of the Nutrition Fact Panel floating around the market place. 21CFR 101 and CFR 317 have very explicit rules for nutritional labeling of single ingredient meat and poultry products and specify the vertical design for all packages with a Principal Display Panel greater than 40 square inches.
